

The Organic
Solution To
Pet
Pollution!

Get your pet to help out in the garden!

Shift!

Pet waste treatment powder

Shift! is a totally natural solution to the problems of pet waste – especially dog and cat droppings.

Just sprinkle **Shift!** over the droppings, and shallow bury in soil – the beneficial microbes in Shift! will accelerate the decomposition in the soil, and deliver nutrients and organic matter to your garden.

What's more, the beneficial microbes in **Shift!** will have out-competed any disease-carrying germs. Soil can be planted into within 2 – 3 weeks.

Suitable for all pet wastes – especially dog and cat waste.

Shift! can also be applied to:

- kitty litter to reduce odour and accelerate breakdown;
- spread on dog runs, kennels and bedding to reduce odour;
- placed in the bottom of bird cages;
- spread in poultry sheds;

Shift! reduces odour and insect problems with any organic waste.

Prices

5 litre Resealable bag \$15.00
20 litre plastic tub \$65.00

Directions

- dig a small hole in garden soil ~ 20 cm deep
- place pet waste into bottom of hole ~ 5 cm deep
- sprinkle a handful of **Shift!** over the waste, covering the entire surface area
- cover with 5-10 cm of soil
- if soil is particularly dry, spray area with water
- you can repeat the above steps to create layers in the hole, or make a new hole elsewhere.
- Always keep the **Shift!** bag completely airtight
